QAT Global

Services 100%

Modernization & Agility

Government entities of all sizes (local, state, and federal) face unique challenges. From increasing the efficiency and effectiveness of existing systems to developing new ones, the challenges are many and varied. For over 20 years, our government clients have trusted QAT Global to answer their most difficult questions and provide realistic solutions.

We understand the unique missions of government and can help address those key priorities and challenges. QAT Global helps all levels of government achieve the outcomes they require including cost-savings, legacy modernization, and increased efficiency and agility.

Our team can work with your organization to develop, customize, upgrade, modernize and integrate software systems that will enable you to transform your business model, increase operational efficiencies, leverage data, improve transparency, and provide your services and programs in a more dynamic, interactive way. At QAT Global, we focus on delivering both functionality and flexibility to help reduce your operating costs and streamline operations, as well as expand your ability to reach new sectors of the communities of which you serve.

We pride ourselves on maintaining a technology agnostic approach to assessing and making recommendations to our clients. We have a proven track record of helping our customers move towards advanced architectures while coexisting with the significant investment they have in legacy software. We can also help you extend the life of your legacy investment by integrating it with new technologies.
