

Capability Statement

QAT Global is a 22-year old global information technology (IT) services company providing full lifecycle services ranging from business analysis and IT consulting to Agile-based software development, implementation, and support with headquarters in Omaha, Nebraska. Our 50+ staff serve the federal and state government, commercial enterprise, and startup markets across the US.

Our Core Capabilities

QAT Global brings CIO-level technology management, software development, data analytics and management, and distributed development experience. Our core competencies are a full range of IT services, including custom software development, legacy modernization, staff augmentation, web development, systems integration, big data and analytics, and testing services. We pride ourselves in being a leader in the delivery of enterprise business solutions through the innovative use of technologies such as Enterprise Java and .NET as well as Open Source components.

Custom Software Development

QAT Global is an experienced development partner delivering forward-thinking, cost-effective and reliable custom software solutions that match your unique requirements.

- Custom technical solutions and rapid application development in cloud and non-cloud environments
- Agile software development processes
- Mobile, web, and desktop application development
- Custom data and systems integration

Information Technology Consulting Services

QAT Global offers IT consulting services that help businesses and governments align their technology strategy with organizational value to achieve your business goals and objectives. Our industry experts will advise you on how to maximize current technology investments, create and execute on a modernization plan, and take advantage of new technologies.

Technology

With more than two decades of successful development and modernization project experience, our team has gained unmatched business and technological expertise. Our unique competence in various technologies and use of proven, repeatable processes enables us to deliver integrated, scalable, robust solutions with the optimal cost/performance ratio. Just a few of our core technology competencies include:

- Cloud Computing -PaaS, Saas, IaaS
- Java
- .NET
- Microservices
- IoT
- CA Gen
- Big Data & Analytics
- QA and Testing
