

Why QAT Global?

All of our consultants undergo a comprehensive interview process tailored to your specific needs. We will go the extra mile to provide highly qualified consultants that blend into your culture and work well with your staff. Our experience enables us to provide agile and cost-effective IT staffing solutions that deliver an exceptional value. That's why our clients include government entities, Fortune 500 companies, as well as smaller local businesses.

IT Staffing Solutions

The speed of business forces you to manage ever-changing IT Staffing demands. Locating, qualifying and managing the staff to complete complex IT projects is time-consuming and costly. Moreover, as soon as one project is complete, another will inevitably arise; consisting of completely different requirements and skill sets. It's a seemingly never-ending cycle that ultimately distracts organizations from focusing on their primary line of business. QAT Global appreciates the importance of having the Right Resource, at the Right Place, at the Right Time – so you can control costs while maximizing profitability with strategic staffing.

We give you a trusted partner who will deliver qualified professional contract and permanent IT staff quickly and efficiently to meet your immediate and long-term business objectives. For more than two decades, QAT Global has been a leading provider of consulting, IT staffing, and specialty technical expertise required for critical IT initiatives.

Recruiting for each position means selling quality of life. We paint an accurate picture of each assignment and the environment. By promoting the unique positives of each position, we are able to recruit the right person to do the job. This results in consultants who are interviewing and ultimately accepting assignments for the right reasons.

How We Can Help

Temporary Staffing Recruitment/Contract Services

A perfect solution for businesses that have frequently changing IT staffing needs. As projects ramp up, we are there to provide the additional technical resources to get the project done on schedule. Our initial search starts with our established network of contacts built up over 20+ years in the IT services and recruitment industry. We have an exclusive database of both associates and contractors that have worked for us over the years on assignments. Knowing our consultants so well, means we can find the right technical and cultural fit for your team. QAT Global also handles all of the human resources functions. As project activity decreases, we take care of discontinuing the additional resources.

Permanent Staff Recruitment Direct Hire

A perfect solution for businesses that need technical resources internally, but may not have the recruiting expertise or resources to attract ideal candidates. As part of an IT solutions company, we have strong in-house technical resources that we use to support the recruiters for both the technical assessment and interview processes. This service allows businesses to immediately hire QAT Global resources as internal employees.

Managed Staffing Recruitment

Increasingly, clients are seeking to reduce the time and risk associated with contract resourcing and are choosing the option of our Managed Staffing Recruitment Solution. Here, we work with our clients at the resource management level to closely understand their environment, potential requirements and culture within the team. The client outlines likely workload peaks and troughs over the forthcoming months and then outsources the responsibility of providing the right level of flexibility and expertise to us throughout the contract period.
